

# Custom Savings

## CUSTOM SAVINGS

Maximum rebate for custom savings is \$75,000 per building per year.  
Rebates are capped at 50 percent of the equipment cost.

Measure Description	Rebate/Unit	Requirements
<b>Custom Savings</b>	\$0.10/kWh	<ul style="list-style-type: none"> <li>• Projects require preapproval</li> <li>• Rebates are based on verifiable energy savings calculation and cannot be based on assumed percent reductions</li> <li>• Baseline efficiency is determined by current state and federal codes</li> <li>• For situations not covered by code, baseline efficiency will be determined by industry standards</li> <li>• Project rebates will be determined by Georgia Power Commercial Program staff after the application is submitted</li> <li>• Rebates are capped at \$75,000 per building per year up to 50 percent of project cost</li> </ul>

Eligible projects must involve the installation of equipment that meets the following criteria:

- Produce measurable and verifiable reduction in electricity consumption
- Have a useful life of and be in operation for at least five years--incentives are not available for changes in behavior or O&M strategies
- Exceed government minimum standards—incentives will be paid only on the energy savings above and beyond minimum federal, state and local mandates on energy efficiency performance

Measures that are not eligible for the program incentive include those that:

- Rely on changes in customer behavior and require no capital investment
- Achieve savings through equipment maintenance, re-commissioning or operational changes, without an equipment efficiency upgrade
- Involve only relocating existing equipment or processes outside of Georgia Power's service territory
- Are required by local, state or federal law; building or other codes; or are standard industry practice
- Produce an electric energy reduction through substitution of another energy source for electricity
- Merely terminate existing processes, facilities or operations
- Involve plug loads
- Are eligible for an incentive through any other energy efficiency program (Lighting, Heating and Cooling, Water Heater, Food Service and Grocery, or Roofing) offered by Georgia Power

This program offers incentives for a variety of custom applications, including but not limited to:

- Refrigeration system upgrades floating head pressure controls
- New Energy Management System (EMS) or EMS upgrade with additional control points
- Comprehensive building design
- Economizer additions or retrofits to existing systems
- Demand controlled ventilation
- Improved air delivery

Additional program rules, including instructions on how to calculate a baseline for your project, are available on the custom savings application. Please contact Georgia Power at **1-877-310-5607** to discuss your upcoming project.
